Famines can be caused by a lack of food or by a lack of access to food. There are many different causes of famines. Extreme weather, plant diseases and animals can all cause a lack of food. Even governments can cut off access to food, resulting in famine.

Throughout history, weather has impacted our food supply. During horrible freezes or severe droughts food prices in the United States and other civilized nations can skyrocket to compensate for the lack of crops. But in other areas of the world weather causes true famine. Sometimes plants get diseases that cause them to die, creating the same lack of crops that weather can create. Animals and bugs can eat and destroy crops as well.

The most surprising cause of famine is tyrannical leaders who keep food from their own people. Today many systems are in place to prevent governments from harming their own people in this way.
Fix the errors you find in the following paragraphs. There are ten mistakes.
